Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Overaker (6,371,958; cited by applicant).

Overaker discloses an implant scaffold device comprising an upper plate 82, a lower plate 84 and a load transfer structure 88 therebetween. The load transfer structure comprises individual supports with attachment structures 90 that are press fit into bores 103 in the lower plate. A fixation tube 170 extends from the lower plate and includes radially extending flanges or barbs 174 (see Fig. 21). The plates comprise a center bore, e.g. 24, and surrounding exposure bores, e.g. 22. The device is formed from porous resorbable polyester (see, e.g., col. 1, lines 5-20 and col. 7, lines 54-58). The assembled device can be considered integral and unitary.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bowman et al. (US 2002/0119177; cited by applicant).

Bowman et al. disclose an implant scaffold device 10 comprising a first or upper plate 18, a second or lower plate 20 and a load transfer structure 14 therebetween (see Fig. 2 and para. 0024). The device is formed from a biocompatible resorbable polyester

Art Unit: 3733

(see para. 0027). The plates and load transfer structure are unitary, and the first plate and load transfer structure are integral. A fixation device such as sutures extend from the device (see para. 0026). It is noted that the device has at least enough structural integrity to be considered to comprise plates (id.).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Comstock whose telephone number is (571) 272-4710.
